Immigration & Health

Sexual and Reproductive Health

Immigrant women need health coverage, not legal barriers.

The 6.6 million women of reproductive age who are not U.S. citizens are **much less likely to be insured...**

... especially those who live in poverty and are often barred from Medicaid.

Notes: Poor women are those in families with incomes under the federal poverty level (\$19,530 for a family of three in 2013). Data include some information on undocumented immigrants, although that information is generally acknowledged to be a considerable undercount of that population group.
Source: Special tabulations of data from the 2014 Current Population Survey (data are for 2013)
