

## Online Resources for Fellowship Search

### ASPPH

ASPPH fellowship and internship programs offer opportunities for current masters and doctoral level students and recent graduates to round out academic training and gain hands-on public health experience while continuing to develop professional skills and expertise in public health.

### Cancer Epidemiology Education in Special Populations (CEESP)

A research training program funded by the NIH/NCI grant # (R25 CA112383) since 2006 to develop careers of public health students from all schools and programs of public health in the U.S. in the field of cancer epidemiology and cancer prevention and control. The CEESP Program provides funding to students to conduct mentored cancer research in global and U.S. minority settings. Dr. Amr Soliman has served as the Principal Investigator and Dr. Robert Chamberlain has served as the Co-Investigator of the CEESP Program since its inception in 2006. Since 2018, the program's leadership is based in the CUNY School of Medicine.

### New York State Public Health Corps (NYSPHC) Fellowship Program

New York State Public Health Corps (NYSPHC) will build public health capacity to support COVID-19 vaccination operations and to increase preparedness for future public health

emergencies. The NYSPHC Fellowship Program provides full-time, paid positions with placements at the NYSDOH, LHDs or other public health system partners. Candidates include recent graduates and students advanced in their studies in public health programs, nursing schools and medical schools, retired medical professionals, and laypeople. Individuals with training in public health, medicine, dentistry, nursing, pharmacology/pharmacy, allied health, social services, communications and information technology, logistics planning, education, and emergency health programs are encouraged to apply.

### **Oak Ridge Institute for Science and Education (ORISE)**

If you are a graduate student looking for the ideal setting to conduct your thesis research, or if you're a master's student preparing to pursue your doctorate, a graduate-level STEM internship or fellowship position can open doors for advanced studies. ORISE offers summer, fall and spring internship programs at locations across the United States for graduate students in STEM disciplines to participate in laboratory experiences to expand their expertise beyond the traditional university setting.

*Recent Graduates:* <https://orise.orau.gov/internships-fellowships/recent-graduates.html>

*Postdoctoral Fellowships:* <https://orise.orau.gov/internships-fellowships/postdocs.html>

### **Presidential Management Fellows (PMF) Program**

The Presidential Management Fellows (PMF) Program was established by Executive Order in 1977 to attract to the Federal service outstanding men and women from a variety of academic disciplines and career paths, who have a clear interest in, and commitment to, excellence in the leadership and management of public policies and programs. By drawing graduate students from diverse social and cultural backgrounds, the PMF Program provides a continuing source of trained men and women to meet the future challenges of public service. The PMF Program is a paid program. While in the program you will receive full salary and benefits just like any other Federal employee. In addition, you may be eligible for repayment of your student loans or other recruitment incentives depending on the agency.
