

Online Resources for Internship Search

CUNY SPH Career Services Webpage

The school receives job and internship announcements from employers on a daily basis. We post these career opportunities on our webpage that you are welcome to review and start applying for:

<http://sph.cuny.edu/student-services/office-of-career-services/career-opportunities/>

In addition to the opportunities listed on CUNY SPH's career opportunities webpage, the websites below can be helpful in your search.

CUNY Jobs & Internships

Student Jobs & Internships at City University of New York

Centers for Disease Control and Prevention (CDC)

The CDC offers a variety of hands-on, short-term internship programs for graduate students still in school. All offer a unique experience in one of many public health fields. Focus areas include Administrative/Communication, Laboratory, Environmental Health, Ethics, Health Education/Communication, General Interest, Infectious Diseases, Epidemiology and Surveillance, and Emergency Response.

For a complete list of CDC sponsored internships for Public Health graduate students, please visit the link below.

NYCDOHMH Epi Scholars Program

The NYC Epi Scholars program is a full-time, paid 10-12 week summer internship program for top graduate epidemiology students at the NYC Department of Health and Mental Hygiene. Scholars receive supplemental training from senior researchers including training in theory, methods, and public health practice to enhance their understanding of the root causes of disease. All scholars have the opportunity to present their findings to senior epidemiologists, key stakeholders and their peers. For many of the scholars this research internship is used to fulfill thesis requirements and often serves as an opportunity to develop a publishable paper or report.

NYCDOHMH H RTP: A Public Health Internship Program

H RTP: A Public Health Internship Program at the NYC Health Department provides the opportunity for undergraduate, graduate and professional school students to experience some of the “real life” challenges of public health. By working on current relevant public health issues under the close supervision and mentorship of experienced professionals, students apply classroom learning to practical problems in a closely matched practicum and, in the process, learn critical skills needed to excel in the field.

LifeSci NYC

The growth of New York City’s life sciences industry depends on attracting and retaining a steady stream of qualified talent to start companies and fill essential roles, especially as New York City’s \$500 million investment is projected to create 16,000 high-paying jobs in the industry. Thus, the City has a vested interest in preparing a diverse range of New York City students for careers in the life sciences sector. The program provides quality internships for undergraduate and graduate students, while offering curriculum and training support with refined “hard” skills in the sciences and “soft” skills of professional and personal development.

U.S. Department of State Virtual Student Federal Service (VSFS)

Make a real difference in the work of the U.S. government through the VSFS program! VSFS is an internship program for American college and university students to virtually intern at U.S. federal agencies. VSFS harnesses the expertise and digital excellence of U.S. citizen students to enhance the work of government through hundreds of remote internship opportunities. Application period is typically in the month of July via USAJOBS.

Oak Ridge Institute for Science and Education (ORISE)

If you are a graduate student looking for the ideal setting to conduct your thesis research, or if you're a master's student preparing to pursue your doctorate, a graduate-level STEM internship or fellowship position can open doors for advanced studies. ORISE offers summer, fall and spring internship programs at locations across the United States for graduate students in STEM disciplines to participate in laboratory experiences to expand their expertise beyond the traditional university setting.

Recent Graduates: <https://orise.orau.gov/internships-fellowships/recent-graduates.html>

The World Health Organization (WHO)

The World Health Organization (WHO), as the leader in global public health issues, is committed to building future leaders in public health. WHO's Internship Programme offers a wide range of opportunities for students and recent graduates to gain insight into the technical and administrative programmes of WHO and enrich their knowledge and experience in various areas, thereby contributing to the advancement of public health.
