

**Department of Environmental, Occupational, and Geospatial Health Sciences  
 Master of Public Health (MPH) Degree in Public Health Nutrition for Macaulay Honors College  
 students**

The goals of the Department of Environmental, Occupational, and Geospatial Health Sciences (EOGHS) at the CUNY Graduate School of Public Health and Health Policy (CUNY SPH) are to identify, explain and mitigate the impact of natural, social, built, food and occupational environments on the health and well-being of populations. Our mission is to facilitate the development of equitable interventions that promote population health. Key to the work of our faculty and students is the translation of theory into effective action, both locally in New York and globally. A fundamental part of our identity is the education and training of the next generation of scientists and public health practitioners imbued with the same ideals, as well as the knowledge and skills to implement them.

Graduates of the MPH in Public Health Nutrition work to promote the nutritional well-being of population groups by assessing the nutritional needs of populations, evaluating and designing nutrition and food programs, and managing nutritional programs in community and institutional settings. Students have the option to pursue the dietetic internship.

Undergraduate students at the Macaulay Honors College, CUNY can complete their BA and MPH in Public Health Nutrition degrees in 4+1 years by following the sequence described in figure 1 and completing the MPH courses described in table 1.

**Figure 1: 4+1 Sequence for BA-MPH students**

**Table 1: MPH Courses and sequence for 4+1 BA-MPH in Public Health Nutrition**

Course Requirements for MPH in Public Health Nutrition	Credits	Semester taken by Macaulay 4+1 BA-MPH students
PUBH 601 (Foundations of Public Health Knowledge)	0	Year 4 Fall
<b>5 Core Courses</b>		
PUBH 610 (Public Health Leadership and Management)	3	Summer
PUBH 611 (Health Equity, Communication, and Advocacy)	3	Summer
PUBH 612 (Designing and Evaluating Public Health Interventions)	3	Summer
PUBH 613 (Designs, Concepts, and Methods in Public Health Research)	3	Summer
PUBH 614 (Quantitative and Qualitative Data Analysis Methods in Public Health Research)	3	Summer
<b>5 Concentration Courses</b>		
FNPB 620 (Community Nutrition Education)	3	Year 4 Fall
FNPB 622 (Food and Nutrition Through the Lifecycle)	3	Year 5 Spring
FNPB 623 (Nutrient Metabolism and Applications in Public Health)	3	Year 5 Spring
FNPB 624 (Nutritional Epidemiology)	3	Year 4 Fall
FNPB 820 (Food Policy)	3	Year 5 Fall
<b>2 Elective Courses</b>		
Elective I	3	Year 5 Fall
Elective II	3	Year 5 Fall
<b>Practice &amp; Culminating Experience</b>		
PUBH 696 (Supervised Fieldwork)	3	Year 5 Fall
PUBH 698 (Capstone Project)	3	Year 5 Spring
<b>Total Credits</b>	<b>42</b>
